

CALL FOR HELP

Dear NCCU Family:

News reports suggest as many as 100,000 people of Haiti may have lost their lives in the earthquake Tuesday. This devastating loss is compounded by the lack of the infrastructure necessary for emergency response such as functioning roads, electricity, water and sewer. The heart-breaking images on TV call to mind the tsunami of 2004 or our own Katrina in 2005.

Some of us have found ways to contribute toward the relief effort; some of us are still looking for a way to help. To you, we ask that you consider sending your check or money order to the NCCU Foundation, marked "Haitian Earthquake Relief" or drop by the William Jones Building with a cash donation. No amount is too small; your \$1 donation may buy the hydration tablet that saves a child's life.

Together, we can show the power of Eagles!

Thank you,

Charlie Nelms
